CRITICAL O&M SUPPORT FOR THERMAL POWER PLANTS

Leverage ST Power Parts Platform

You search spare parts curated from inventories of the ST Power Parts global user community.

User Community

ST Power Parts helps its user community audit, list & share spare parts with each other.

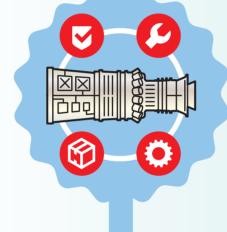

Consulting

ST Power Parts' expert, in-house consulting team is available to assess the part's usability with or without repair, support installation/commissioning, and provide other site support, as required.

TO MONTHS

WEEKS

Up & Running!

And the unit/plant is back in operation. Low costs & minimum downtime.

OEM Outreach You request replacement part directly from manufacturer.

Custom Machine & Tool Part Given your legacy technology the repair

Given your legacy technology, the repair or replacement part requires high costs & long lead time. ONTHS

YEARS

MONTHS

YEARS

MONTHS

YEARS

Scope Creep

OEM makes compelling recommendation for upgrading part(s)/unit. Results in high capital costs & long downtime.

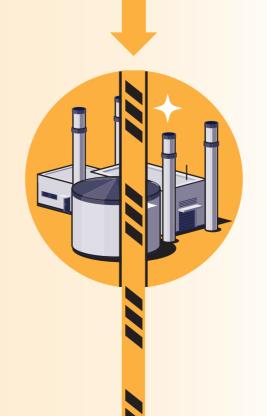

Costs Mount

In addition to losing revenue, you continue buying replacement capacity to fulfill market commitment.

Unnecessary Facility Upgrades

What began as a single part failure expands into a potential upgrade/rebuild. Results in capital investment, long downtime & loss of revenue.

Down & Out (Of Money) Despite massive outlays

of cash & time, your upgraded unit/plant is not yet operational.
